

PRICES

Listed below are the approximate prices for various preparations. These will be adapted according to the specific order, prices in €uro will depend on exchange rates. Postage will be charged separately.

PRODUCT	PRICE	
	€	SFR.
THIN SECTIONS, WITHOUT COVER SLIPS		
Normal rock samples without cracks or pores staining (blue or fluorescent) possible	24.-	35.-
Rock samples with cracks and large pores impregnated with epoxy (clear, blue or fluorescent) 1-3 times and hardened	37.-	55.-
THIN SECTIONS WITH COVER SLIPS		
Normal rock samples without cracks and pores staining (blue or fluorescent) possible	27.-	40.-
Rock samples with cracks and large pores impregnated with epoxy (clear, blue or fluorescent) 1-3 times and hardened	40.-	60.-
Rock samples with large cracks and pores impregnated with epoxy (clear, blue or fluorescent) 1-4 times and hardened	54.-	80.-
Dry-polished sections (gypsum, anhydrite, salt) staining (blue or fluorescent) possible	54.-	80.-
POLISHED THIN SECTIONS		
Treated with epoxy, diamond polished (0.25 µm) depending on the sample	from 47.-	70.-
FLUID INCLUSION PREPARATIONS		
Quartz: Polished on both sides	47.-	70.-
Quartz/Calcite: Staining (blue or fluorescent) possible stuck on a cover slip (0.1 mm) and polished on both sides (0.03 mm thick)	60.-	90.-

PRODUCT	PRICE	
	€	SFR.
TEM-SECTIONS		
Removed from glass slide and stuck on tape thermal adhesive, max. 80 °C, top side polished, impregnated with epoxy if necessary Thickness: 0.03 mm	47.-	70.-
Not removed from glass slide thermal adhesive, max. 80 °C, diamond polished on both sides, impregnated with epoxy if necessary Thickness: 0.03 mm	54.-	80.-
COALIFICATION SAMPLES		
Impregnated with epoxy (max. 50 °C) embedded, polished (0.25 µm diamond powder) sample size should be max. 2.5 x 2.5 x 1.0 cm	from 47.-	70.-
ULTRA-THIN SECTIONS		
Quartz Impregnated with epoxy 1-2 times and hardened, polished on both sides to a thickness of 2-6 µm	from 80.-	120.-
Calcite Impregnated with epoxy 4-5 times and hardened, polished on both sides to a thickness of 2-6 µm	from 167.-	250.-
LARGE SECTIONS		
Impregnated with epoxy, with cover slip max. sample size is 10 x 6.5 cm	from 54.-	80.-
PREPARATION OF FOSSILS	on request	

For all preparations except coalification samples, large sections and fossils, samples should be no larger than 3.5 x 2.3 cm and no thicker than 0.5 - 1.5 cm.

Naturally there are many more possible preparation possibilities than the ones listed above (Standards for electron microprobes, tapering sections, embedded polished sections etc.). If the product you want is not listed, please do not hesitate to contact us.
